

# **Aspect Based Sentiment Analysis for Fashion Products**

**Springboard Data Science Career Track**

## Context

Fashion industry is characterized by rapidly changing trends and consumer preferences.

## Problem

Develop a novel aspect based sentiment analysis (ABSA) pipeline for extracting aspects from fashion product reviews and predicting the sentiment toward each aspect.

## Constraint

- No annotated data for supervised learning
- Neural network model requires GPU for training, but there are runtime and RAM constraints on Google Colab

# ABSA Pipeline

## Natural Language Processing

Preprocess and tokenize textual data, extract nouns and adjectives for aspect extraction through POS tagging

## Aspect Extraction

Provide a list of six aspects for fashion products: *color, design, material, price, quality, sizing*. Use the unsupervised approach to extract aspects from the nouns and adjectives.

## Sentiment Prediction

Train a classification model on the preprocessed textual data to predict the sentiment of each aspect for fashion product reviews.

# The Dataset

- Product reviews from [Amazon Fashion](#).
- Time period: 2002 - 2018
- Number of records: 883,636
- Number of fields: 12

# Data Wrangling

Remove duplicates and missing values

Natural language processing:

- Remove urls
- Remove html tags
- Remove extra white spaces
- Remove accented characters
- Expand contractions
- Convert all characters to lowercase
- Remove special characters
- Lemmatize tokens
- Extract nouns and adjectives

Keep stop words, punctuations and numbers

Original  
Review

*"Love it but it tore up shortly after I got it. I ordered two and they both tore at the part that connects to the metal. Great seller though. Very prompt."*

Processed  
Review

love, it, but, it, tear, up, shortly, after, i, get, it, ., i, order, two, and, they, both, tear, at, the, part, that, connect, to, the, metal, ., great, seller, though, ., very, prompt, .

Nouns &  
Adjectives

part, metal, great, seller, prompt

# Aspect Extraction

# Sentiment Prediction

## Labels:

- Positive - 4 & 5 star rating
- Neutral - 3 star rating
- Negative - 1 & 2 star rating

## Features:

- BOW with unigram and bigram features
- TF-IDF with unigram and bigram features
- Word2Vec

## Machine Learning Algorithms:

- Logistic Regression
- Multinomial Naive Bayes
- Random Forest

## Neural Network Algorithms:

- LSTM
  - LSTM
  - Bidirectional LSTM
  - LSTM with attention layer
- Transformer (BERT model)

# Model Evaluation

		Accuracy	F1	F1 Positive	F1 Neutral	F1 Negative	Predict Time (seconds)
Model	Feature						
Logistic Regression	BOW	0.85	0.84	0.93	0.36	0.79	
	TF-IDF	0.86	0.84	0.93	0.34	0.80	0.125
Multinomial Naive Bayes	BOW	0.84	0.83	0.92	0.31	0.78

## Positive Review Example

★★★★☆ **Colors are not correctly represented in the photos**

Reviewed in the United States on September 24, 2020

Color: Matte Havana/Blue | Lens Width: 55 Millimeters | **Verified Purchase**

Just got the pair described as Matte Havana / Blue. The colors are not even close to the photos. In the photos on Amazon they look royal blue and orange. They are in fact slate blue, almost gray, on the outside of the ear pieces, and basically coffee or caramel colored on the inside. While the look is still very cool, it is not accurate on this site at all. I own another pair of these that I have enjoyed for many years, and I am going to keep these, but be aware that the colors are pretty hard to pick out on this site and they are WAY off, like, not even close.

**Review:** just got the pair described as matte havana / blue. the colors are not even close to the photos. in the photos on amazon they look royal blue and orange. they are in fact slate blue, almost gray, on the outside of the ear pieces, and basically coffee or caramel colored on the inside.

**Aspects:** color

**Sentiment:** Negative

## Neutral Review Example

★★★★☆ Off center logo....

Reviewed in the United States on June 20, 2020

Size: One Size | Color: Black/White

Kind of pissed. First one i got. Ended up being bleached from sweat which seems stupid as its an athletic hat and i only had it for two months in the winter.

Ordered another and the logo was off center.

Dont know if ill buy again if i cant even be guarenteed quality and cant speak to anyone about making sure the hats logo is centered. As it should be.

## Negative Review Example

**Review:** garbage quality product and nothing like the picture.

**Aspects:** quality

**Sentiment:** Negative

**Review:** fabric looks thick and nice color on the picture.

**Aspects:** material, color

**Sentiment:** Positive

**Review:** the real thing is dull and very cheap fabric that it looks secondhand.

**Aspects:** price, material

**Sentiment:** Negative

**Review:** false advertisement

**Aspects:** general

**Sentiment:** Negative

**Bas quality. Fake Product**

Reviewed in the United States on January 13, 2021

Color: 02blue | Size: Medium | **Verified Purchase**

Garbage quality product and nothing like the picture. Fabric looks thick and nice color on the picture. The real thing is dull and very cheap fabric that it looks secondhand. False advertisement

# Future Improvements

- Extract quantities, measurements and their units from numbers in the preprocessing step, and utilize them to improve aspect extraction and sentiment prediction results.
- Train a model on annotated data for better aspect extraction.
- Include emoticons as features for the sentiment prediction.
- Tune hyperparameters for the transformer model.
- Train the LSTM model on the entire Amazon Fashion review dataset.

**Thank You**
